

Little Budgie Done Fudgie: The Sugarless Treat That's Safe for Your Bird

Budgies are small, active birds that love to eat. In the wild, they would eat a variety of fruits, vegetables, seeds, and insects. However, when budgies are kept as pets, they often have a limited diet that is high in sugar and low in nutrients. This can lead to a variety of health problems, including obesity, diabetes, and heart disease.
