Authorship and Recognition

'Statistics for Finance' is authored by two renowned experts in the field: David Ruppert, Professor of Statistics at Cornell University, and Stefan Matic, Senior Vice President at Axioma.

The book has gained widespread recognition for its in-depth coverage, clear explanations, and practical applications. It is a valuable resource for students, researchers, and practitioners in the field of finance and related disciplines.

Scope and Content

'Statistics for Finance' covers a wide range of topics, including:

- Descriptive statistics and data visualization

- Probability and random variables

- Statistical inference

- Regression analysis

- Time series analysis

- Risk management

- Forecasting

Each chapter is structured to provide a comprehensive overview of the topic, followed by detailed explanations, examples, and exercises. The book also includes numerous case studies and real-world examples to illustrate the practical applications of statistical methods in the financial industry.

Features and Benefits

Some of the key features and benefits of 'Statistics for Finance' include:

- Comprehensive coverage of statistical methods and applications in finance

- Clear and concise explanations with detailed examples

- Numerous case studies and real-world examples

- Practical exercises and questions to reinforce understanding

- R code and data sets for hands-on learning

Intended Audience

'Statistics for Finance' is primarily intended for students and researchers in the field of finance, economics, and related disciplines. However, it is also a valuable resource for practitioners in the financial industry, including:

- Portfolio managers

- Risk managers

- Financial analysts

- Data scientists

'Statistics for Finance' by Chapman & Hall/CRC is an essential guide for anyone who wants to understand and analyze financial data. Its comprehensive coverage, clear explanations, and practical applications make it an invaluable resource for students, researchers, and practitioners in the field of finance.

Whether you are a beginner or an experienced professional, 'Statistics for Finance' will provide you with the statistical knowledge and skills you need to navigate the complexities of financial data and make informed decisions.

## About the Authors

David Ruppert

David Ruppert is Professor of Statistics at Cornell University. He has published over 100 papers in top academic journals and is a Fellow of the American Statistical Association.

Ruppert's research interests include statistical inference, nonparametric statistics, and computational statistics.

Stefan Matic

Stefan Matic is Senior Vice President at Axioma.

Matic has over 20 years of experience in the financial industry. He is a recognized expert in risk management, portfolio optimization, and quantitative finance.
