The Knowledge Base for Fisheries Management (ISSN 36) is an open access, peer-reviewed journal that publishes original research articles, reviews, and case studies on all aspects of fisheries management. The journal is committed to publishing high-quality research that contributes to the understanding and management of fisheries resources.

### Scope of the Journal

The Knowledge Base for Fisheries Management covers a broad range of topics, including:

- Fisheries science and ecology
- Fisheries management and conservation

- Aquaculture and mariculture
- Fisheries policy and economics
- Fisheries governance and stakeholder engagement
- Climate change and fisheries
- Fisheries technology and innovation

## **Aims and Objectives**

The Knowledge Base for Fisheries Management aims to:

- Provide a platform for the dissemination of high-quality research on fisheries management
- Promote the exchange of knowledge and ideas among fisheries scientists, managers, and stakeholders
- Contribute to the development of sustainable fisheries management practices

## **Editorial Board**

The Knowledge Base for Fisheries Management is led by an editorial board of distinguished fisheries scientists and managers. The editorial board is responsible for overseeing the journal's content and ensuring the quality of published research.

The current editor-in-chief of the Knowledge Base for Fisheries Management is Dr. Jane Doe. Dr. Doe is a professor of fisheries science at the University of California, Davis. She has extensive experience in

fisheries research and management, and she is dedicated to the promotion of sustainable fisheries practices.

## **Submission Guidelines**

Authors are invited to submit original research articles, reviews, and case studies to the Knowledge Base for Fisheries Management. All submissions must be written in English and must adhere to the journal's submission guidelines.

Submission guidelines can be found on the journal's website:

<https://www.kbfm-issn-36.org/submissions>

## **Peer Review Process**

All submissions to the Knowledge Base for Fisheries Management are subject to a rigorous peer review process. Each submission is reviewed by two independent reviewers who are experts in the field. The reviewers' comments are used to make a decision on whether to accept or reject the submission.

The peer review process is designed to ensure that the journal publishes high-quality research that is relevant to the fisheries management community.

## **Publication Process**

Accepted submissions are published online in the Knowledge Base for Fisheries Management. The journal is published on a quarterly basis.

Authors are given the opportunity to proofread their articles before they are published. Once an article is published, it is assigned a (Digital Object

Identifier). This is a unique identifier that can be used to cite the article.

## Open Access

The Knowledge Base for Fisheries Management is an open access journal. This means that all articles published in the journal are freely available online to anyone with an internet connection.

Open access publishing allows for the widest possible dissemination of research findings. It also makes it easier for researchers, managers, and stakeholders to access the information they need to make informed decisions about fisheries management.

The Knowledge Base for Fisheries Management is a valuable resource for fisheries scientists, managers, and stakeholders. The journal provides a platform for the dissemination of high-quality research on all aspects of fisheries management. The journal is committed to open access publishing, which makes its research findings freely available online to anyone with an internet connection.
